

Nescot College Student Transfer Information

General condition of registration F2

Nescot is committed to ensuring that every student is satisfied with their chosen programme of study. However, we also recognise that some may question their decision to stay on their enrolled programme and may wish to move to another programme or transfer to another provider altogether. Likewise, students from other providers may wish to join Nescot.

Nescot has no formal process for the transfer of students to/from other institutions and individual cases will be considered in line with the College's admissions policy and Recognition of Prior Learning policy.

Outgoing student transfers:

Should a Nescot student decide to withdraw from their studies for any reason and transfer to another provider, it is the responsibility of the student to ensure that they check the admissions policy of the new provider to assess the viability of this decision. It may be possible for students to claim credit for completed modules where appropriate, but these claims must align with the examination or assessment boards of the relevant validating University or awarding body. It is at the sole discretion of the new provider to accept or decline applications from students with partial credits from their qualification in line with their own Admissions and Recognition of Prior Learning policies.

Incoming student transfers:

Should a student external to the College wish to apply for a transfer into a Nescot programme of study outside of the advertised start date, this will be considered under Nescot's Recognition of Prior Learning Policy. Discretionary consideration will also be made as to a student's suitability for a programme where there is evidence of significant gaps in attainment or tuition.

Internal transfers:

Where a student identifies within the first two weeks of a programme start date that they wish to transfer to another Nescot qualification, they can seek advice from the Advice and Guidance team as to their suitability and the availability of places on the alternative programme. Should they meet the entry requirements in full and receive approval to transfer from the Programme Lead on their new programme, they can complete transfer documentation to make the necessary changes. Students will also need to inform the Student Finance Team where student loans have been granted.

Applications for transfer between courses are generally not considered more than two weeks after a programme start date.
